

Electronic Counter Warfare measures in your own pocket!

Chances are that you or someone you know has been the victim of electronic warfare,

Scary stuff!

Imagine, you are standing at the check-out of your favorite grocery store patiently waiting for the lady ahead of you to pay and be on her way.

In the checkout aisle next to you is a frazzled mother trying to keep her cranky three-year-old under control.

To make matters worse in all this chaos a big burly shoulder bag wearing fellow decides that the shortest way out is to make a third aisle by pushing his way past you and your fellow shoppers, smacking each and every one of you

with his shoulder bag.

What you did not suspect is that this chaotic moment was deliberately chosen by the big burly fellow to use the electronic card reading device in his shoulder bag to steal the information off your cards and the cards of the other shoppers.

Electronic warfare!

Now you can fight back with your own counter measures by carrying your precious cards in the Delta 2 Alpha CardVault!

Tall dark and handsome. The CardVault has a scratch resistant black coating that is tastefully highlighted by a laser cut logo.

The CardVault is shown here in actual size. Note: that the Card Release trigger is ergonomically placed.

The CardVault is a case made of aluminum, a material chosen for its light weight and unique ability to help shield the cards from electronic signals.

After all it is intended unobtrusive for pocket carry! With a scant weight of just 45 gm coupled with its tight dimensions of a mere 10.5cm x 7cm x 1.5cm the CardVault is a joy to carry while keeping up to six cards secure!

Order your pocket full of ECW Measures with the CardVault .

The D2A CardVault 100-400-011-000

Made in Canada
Hs 7616.99.10

Viola! Slide the trigger and the secured cards now poke out for easy access.
